

Pranata Pramudya

Backend Engineer (Node.js & Cloud Services)

pranataprp@gmail.com • +6281234567890 • Indonesia (Nasional / Remote / Seluruh Kota) • [LinkedIn](#) • [Portfolio](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Full-stack engineer with 4+ years of experience designing resilient microservices and high-throughput APIs using Node.js, TypeScript, and PostgreSQL. Proven track record of reducing API latency by up to 80% and automating CI/CD pipelines to cut deployment time from 40 to 8 minutes. Strong expertise in cloud-native architectures, automated end-to-end testing, and observability tooling, delivering 99.9% uptime for SaaS platforms.

CORE COMPETENCIES & KEYWORDS

Node.js & Express

TypeScript

PostgreSQL performance tuning

Microservices & serverless architecture

CI/CD (GitHub Actions, Docker)

Automated testing (Playwright, Jest)

Observability (Prometheus, Grafana, OpenTelemetry)

Cloud platforms (AWS, GCP)

RESTful API design

Performance optimization

PROFESSIONAL EXPERIENCE

Lead Full-stack Engineer

2023 - Present

Digital Inovasi Solusindo

- Architected serverless microservices with Node.js and Next.js, boosting API throughput by 45% while maintaining transactional integrity.
- Implemented automated end-to-end testing using Playwright and AI-assisted validation, saving >120 hours of manual QA per month.
- Optimized PostgreSQL queries and Prisma ORM mappings, cutting average response latency from 420 ms to 85 ms.
- Designed a real-time analytics dashboard (React 19, TailwindCSS, Server-Sent Events) achieving 99.9% uptime and full observability via Prometheus.

Software Engineer (Full-stack)

2021 - 2023

Kreatif Solusi Mandiri

- Built e-commerce platform and internal dashboards with Next.js, TypeScript, and TailwindCSS serving >50k active monthly users.
- Created distributed relational schemas on PostgreSQL with Redis caching, reducing peak server load by 30% and ensuring low-latency data access.
- Automated CI/CD pipelines using GitHub Actions and Docker, decreasing deployment cycle from 40 min to 8 min and integrating automated integration tests.
- Collaborated with product and UX teams to deliver WCAG AA-compliant, responsive interfaces.

SELECTED PROJECTS

Autonomous Auto-Apply Agent

Next.js 16, TypeScript, Playwright, Groq LLM, Prisma, PostgreSQL

AI-driven talent acquisition system that auto-generates ATS-tailored resumes, performs stealth bot evasion, and sends recruiter outreach emails. Increased application efficiency by 10x with automated dry-run verification and screenshot audit trails.

High-Throughput Lead Enrichment Engine

Node.js, TypeScript, Playwright, Better-SQLite3, Worker Threads

Real-time B2B lead crawling and enrichment pipeline with automatic deduplication and LLM-based scoring. Processes up to 5000 leads per hour while bypassing Cloudflare CAPTCHA challenges.

Enterprise Analytics Dashboard

React, Next.js App Router, TailwindCSS, Server Components

Multi-tenant SaaS analytics dashboard delivering real-time performance metrics and encrypted report exports. Achieved Google Lighthouse scores of 98+ for performance and accessibility.

EDUCATION

Sarjana Komputer (S.Kom) - Teknik Informatika - Universitas Komputer Indonesia

2017 - 2021
